PROJECT REPORT ON College Management System

Program Name: BCA

Advance Web Development/Code: 23CAT-301

Submitted by:

Name: Anushma Kumari

UID: 23BCA10535

Section: 23BCA-2 “B”

Submitted to:

Name: Abhineet Thakur

Designation: Asst. prof

1. Project Report: College Management System

2. Aim of the Project: -

To develop a web-based platform that automates and simplifies college administrative and academic activities, including student registration, attendance tracking, faculty management, timetable scheduling, and record maintenance.

3. Objective: -

- To automate manual college operations and record management.
- To create a secure, user-friendly web system for students, faculty, and administrators.
- To reduce time and human error in handling academic and administrative data.
- To improve transparency and communication within the college ecosystem.

4. Tools and Technologies Used: -

-  **Frontend:**
- HTML5 – Structure of webpages
- CSS3 – Layout and responsive design
- JavaScript – Interactivity and dynamic content

Backend:

- PHP (v8.x) – Server-side scripting and logic implementation
- MySQL – Database for storing student, faculty, and admin records

Security:

- Role-based authentication (Admin, Faculty, Student)
- Data validation and encryption for login and sensitive records

5. System Requirements: -

Hardware:

- Processor: Intel i3 or above
- RAM: Minimum 4GB
- Storage: 500MB available space

Software:

- OS: Windows/Linux
- Server: XAMPP or WAMP
- Browser: Chrome/Edge
- Database: MySQL
- Language: PHP, HTML, CSS, JavaScript

6. Algorithm / Logic: -

- **Login Authentication:** Validate role-based credentials (Admin, Faculty, Student).
- **Database Connection:** Establish secure MySQL connectivity using PHP.
- **CRUD Operations:** Manage create, read, update, delete functionalities for all modules.
- **Dynamic Pages:** Load dashboards and data dynamically for different user roles.
- **Search & Reports:** Generate attendance, exam results, and timetable dynamically.

7. Code Overview: -

index.php: Homepage and login interface

admin_dashboard.php: Admin controls for managing students, faculty, and schedules

student_portal.php: Student view for attendance, results, and timetables

faculty_portal.php: Faculty view for marking attendance and uploading results

database.php: Handles connection to MySQL database securely

style.css: UI layout and responsive styling

Code: -

```

index.php
1  <?php
2  ob_start ();
3  session_start();
4  require "php/config.php";
5  require_once "php/functions.php";
6  $user = new login_registration_class();
7  if($user->get_admin_session()){
8      header(header: 'Location: admin.php');
9      exit();
10 }
11 }
12 }
13
14 <?php
15 $pageTitle = "Admin Login";
16 }
17 <?php include "header.php"; ?>
18
19 <div class="loginform fix">
20 <div class="msg "><h3><i class="fa fa-user" aria-hidden="true"></i> Admin login</h3></div>
21 <div class="access">
22 <?php
23 if($_SERVER['REQUEST_METHOD'] == "POST"){
24     $username = $_POST['username'];
25     $password = $_POST['password'];
26
27     if(empty($username) or empty($password)){
28         echo "<p style='color:red;text-align:center;'>Field must not be empty.</p>";
29     }else{
30         $password = md5(string: $password);
31         $login = $user->admin_userlogin(username: $username, password: $password);
32         if($login){
33             header(header: 'Location: admin.php');
34         }else{
35             echo "<p style='color:red;text-align:center;'>Incorrect username or password</p>";
36         }
37     }
38 }
39
40 <form action="" method="post">
41 <input type="text" name="username" placeholder="Username" />
42 <input type="password" name="password" placeholder="Password" />
43 <input type="submit" value="Login" />

Conclusion: -

The **College Management System** successfully automates core academic and administrative processes. It minimizes manual effort, improves data accuracy, and promotes efficient communication among students, faculty, and administration through a secure and easy-to-use platform.

10. Learning Outcomes: -

- Gained experience in full-stack web development using PHP and MySQL.
- Understood database design and CRUD operations.
- Implemented authentication and role-based access control.
- Learned how to integrate frontend and backend components effectively.
